

# RISK MANAGEMENT SERVICES

**GUARANTEE YOUR PROJECT COMMITMENTS: BUSINESS ASSURANCE**

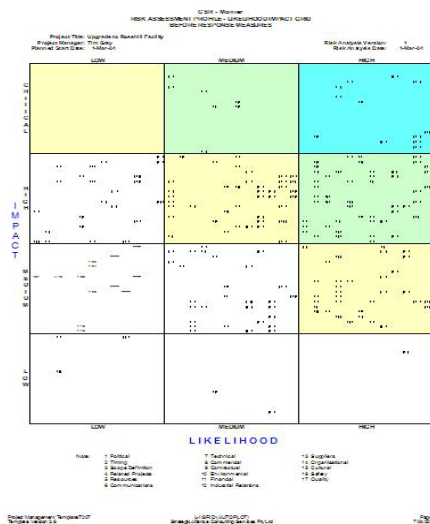

**STRATEGICALLIANCE Risk Management Services** ensure that when a mission critical project has been commissioned, you can control the timeline, the costs and the outcomes. In other words, you can sleep easy at night and bank on the results!

**STRATEGICALLIANCE Risk Management Strategy** not only identifies the risks associated with a project, but provides the structure and systems to monitor and manage them through to project success.

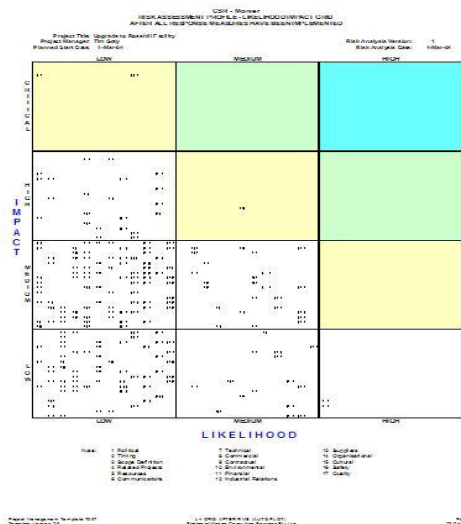

StrategicAlliance Risk Management strategies identify all risks, from those that are controllable to external factors that act upon your project. Our methodology forces risks to be removed or contained prior to project commencement. Where this is not possible, response measures are prepared and reporting structures and systems are introduced to monitor and continually assess the few remaining risks.

All reports and communications are delivered in a clear and logical format for ease of understanding and dissemination of information.

**Risk before RMS Analysis**

**Risks after RMS Analysis**

**Customised reporting templates typically include; Risk Response tracker, Progress to Milestone plan, Steering Minutes, Executive Summary, Management Communication and Supply Plan Status.**

**STRATEGICALLIANCE Consulting Services tools** are designed to drive profit improving change through your organization. They are uniquely formulated using a simple philosophy: **Maximise sustainable profit, minimise resources required.**
